Stäubli

TX90 Range

6 axis industrial robot

A unique 4 axis and 6 axis robot range for all applications

Whenever industrial companies need speed, repeatability and reliability, Stäubli robots provide the most appropriate answer. To satisfy its customers, Stäubli Robotics has developed specific solutions, meeting the needs of all industries: electronics, medical, automotive, food, plastics, mechanical or painting.

Designed to work in the most hostile environments, but also to meet stringent cleanroom requirements, Stäubli robots demonstrate their efficiency in all circumstances.

With performance always in mind.

MAN AND MACHINE

Reliability, flexibility, performance

TX 6-axis industrial robots feature an articulated arm for extraordinary dexterity and flexibility. This range of robots is designed to handle various applications in many industrial sectors. The compactness of

the arm and the large work envelope allow maximum utilization of cell workspace. The integration of the robot on the production line is easier thanks to multiple attachment methods (floor, wall, ceiling). The robot arm's

rugged, fully enclosed structure makes it ideal for applications in harsh environments.

TX90L model

High precision, long life time and reduced maintenance
JCS gearbox designed by Stäubli

Optimum use of the work area
Less floorspace needed, large work envelope

Eliminating complex cable management
Connections directly on the robot forearm

Flexible integration on the production line
Multiple attachment methods

Work in difficult environments
Vertical outlet, complete protection of connection

The added values of Stäubli robot arms

Optimum cleanliness, arm motion freedom and production reliability

- All cables and pipes routed through the arm removing obstacles from the work area
- Enclosed structure

Texture and color customization

- Choice of arm finish

Precise trajectory performance

- Increased part quality
- Reduced rework costs
